Underflow e Overflow

SPF (base, nº dígitos a direita da vírgula, expoente mínimo, expoente máximo)

SPF(10, 2, -5, 5)

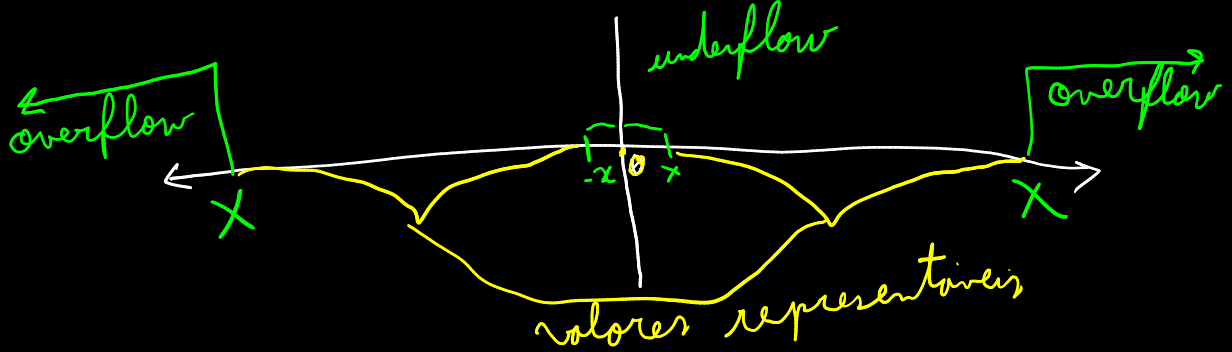

$0,0000025 = 0,25 \times 10^{-6}$ (underflow) → -5

$0,31415926535 \times 10^{8}$ (Overflow)

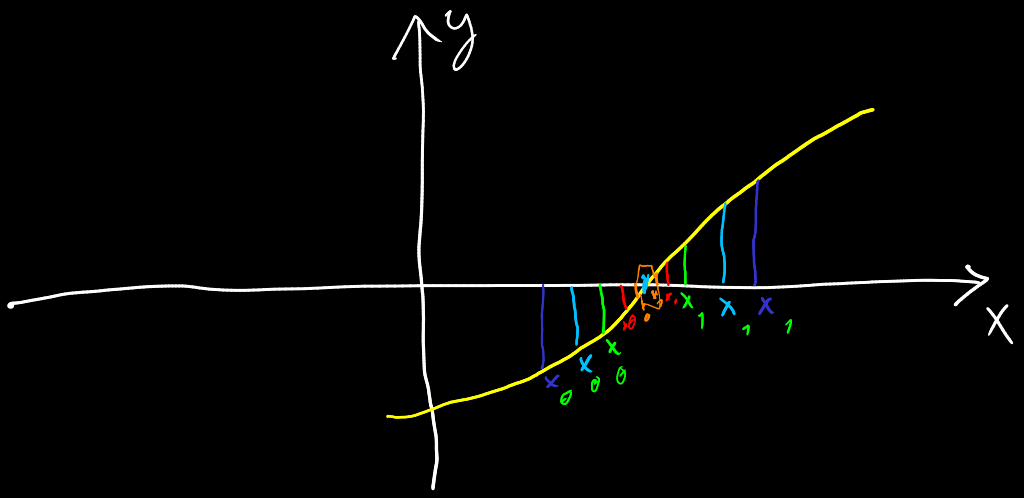

$= 31\,415926,535$

$x = 0,10 \times 10^{-5} = 0,000001$

$X = 0,99 \times 10^{5} = 99000$

Método da dicotomia

$$x_c = \frac{x_a + x_b}{2}$$

$f(x) = e^x + \frac{1}{2}x$
